CYBER SECURITY GOVERNANCE · TRUSTED ADVISOR

# Your virtual CISO, always by your side

An expert, continuous and independent guide that turns business goals into concrete security decisions — with the accountability and vision of a Chief Information Security Officer, without the cost of a dedicated in-house resource.

Strategy & Governance | ISMS · NIS2 · DORA | Continuous oversight

## A Trusted Advisor for your security

GOVERNANCE · STRATEGY · COMPLIANCE

As a **Trusted Advisor**, NSI Advisor supports the client in managing and governing Cyber Security through the role of a **virtual CISO (vCISO)**. The service brings **SMBs and SMEs** high-level strategic expertise — normally reserved for large organizations — supporting Management and the ICT Team in decision-making, vendor governance, regulatory compliance and readiness for incidents and audits, with lasting oversight and continuity.

### Enterprise expertise
Big-enterprise know-how, accessible to SMBs and SMEs

### Independence
Objective advice, free from vendor bias

### Continuous oversight
A constant guide, not an occasional intervention

### Compliance
Alignment with ISMS, NIS2 and DORA

**Monthly check-in**
with ICT Team & Management

**Half-yearly check-in**
alignment with the DPO

**On-call support**
expert support in emergencies

## What the vCISO service covers

END-TO-END OVERSIGHT

A single point of reference covering the whole governance lifecycle: from strategic choices to vendor management, from compliance to business continuity, through to emergency response.

### 1 Strategic support to Management

CYBER STRATEGY · DECISION SUPPORT

Guidance on strategic Cyber Security choices, aligning investments and priorities with business goals.

### 2 Vendor governance, Hardening & configuration review

VENDOR GOVERNANCE · TUNING & HARDENING

Support to the ICT Team in governing vendors and in Tuning and Hardening activities, with periodic review of configurations and of identities holding administrative privileges — for both the client and its vendors.

### 3 Support for Assessments & Audits

CLIENTS · VENDORS · THIRD PARTIES

Assistance with assessments and/or audits requested by clients or vendors, both when responding and when verifying.

### 4 On-call in case of emergency

INCIDENT & CRISIS SUPPORT

An expert point of reference, quickly available in critical situations to guide decisions.

### 5 Monthly periodic check-in

ONCE A MONTH

A recurring meeting with the ICT Team and, when needed, Management, to monitor posture and priorities.

### 6 Periodic check-in with the DPO

TWICE A YEAR

Half-yearly alignment with the Data Protection Officer on privacy, obligations and compliance.

### 7 ISMS Policies & Business Continuity

DOCUMENTATION GOVERNANCE · BUSINESS CONTINUITY

Support in drafting and reviewing ISMS Policies and designing business continuity, with definition of the key parameters and plans.

RTO / RPO · BIA · Service Map · Business Recovery Plan · Disaster Recovery Plan · Incident Response Plan

ONE SOLUTION DOESN'T EXCLUDE THE OTHER

# Extend governance with operational services

The vCISO drives the strategy; these complementary services — available individually or combined — extend its technical and operational reach, for complete and coherent defense.

## 1 SOC — Security Operations Center

OPEN XDR AI-NATIVE · BASE / STANDARD / ADVANCED

Detection, investigation and response managed by our analysts on the AI-native Open XDR platform, with coverage up to 24/7 on-call and guaranteed SLAs.

## 2 CTI — Cyber Threat Intelligence

DARK/DEEP WEB · TELEGRAM · X · OSINT

Proactive monitoring to identify targeted threats, compromised credentials and exfiltrated data early.

## 3 Vulnerability Early Warning

CVE · EPSS · CISA KEV

Proactive alerts on vulnerabilities in your technologies, before active exploitation.

## 4 Periodic Vulnerability Assessment

POWERED BY QUALYS

Structured, recurring scans with clear reporting and risk prioritization.

## 5 Red Teaming — Penetration Testing

INFRASTRUCTURE AND/OR APPLICATION · PROJECT-BASED

Offensive testing to validate the effectiveness of defenses in the field and identify real exposures.

## 6 Table Top Exercise Cyber

CRISIS SIMULATION

Guided crisis simulations to test the decision-making and response plans of Management and the Team.

## 7 Supply Chain Risk Management — Panorays

TPCRM · THIRD PARTY CYBER RISK

Structured management of vendor and end-to-end supply-chain risk.
